27/Feb/23 - 03/Mar/23

Epic / Issue / Worklog	Key	Logged	27 Mo	28 Tu	01 We	02 Th	03 Fr
<input checked="" type="checkbox"/> Add the Required quantity field in the QLI header within the approvals view	INVENT-398	1.5	1.5				
<input checked="" type="checkbox"/> Worked on debugging the approval_quantity not working properly for the rooms in approval view. It was found that the function was called multiple times in the hook.	INVENT-398	1.5	1.5				
<input checked="" type="checkbox"/> Available Quantity in and Approve button	INVENT-368	3	3				
<input checked="" type="checkbox"/> Worked on adding a popup alert when ever there any unsaved changes in any record of the approval view. So the user should first save the changes and then proceed to approve selected or approve all. Also had a discussion with fellow dev on his issue related to the script.	INVENT-368	3	3				
<input checked="" type="checkbox"/> Expand / Resizable columns in Approvals View	INVENT-321	3	3				
<input checked="" type="checkbox"/> Worked on fixing the issue of header columns of approvals view. There was extra space appending in the last header column when we expand/collapse the headers.	INVENT-321	3	3				
<input checked="" type="checkbox"/> General Team Tasks	GEN-1	11	0.5	3	1	5	1.5
<input checked="" type="checkbox"/> Scrum and catch up meeting	GEN-1	0.5	0.5				
<input checked="" type="checkbox"/> Scrum and catch up meeting	GEN-1	0.5		0.5			
<input checked="" type="checkbox"/> Approvals Process Sprint 6 Demo with Rob	GEN-1	1		1			
<input checked="" type="checkbox"/> Internal demo session with team on approvals process sprint 6. Also worked on quick fixes in the approvals view which were found during demo.	GEN-1	1.5		1.5			
<input checked="" type="checkbox"/> Scrum and catch up meeting	GEN-1	0.5			0.5		
<input checked="" type="checkbox"/> Weekly client call	GEN-1	0.5			0.5		

<ul style="list-style-type: none"> ✔ Worked on the MR for deployment of approvals process sprint 6, after that, done the deployment of approvals process sprint 6 on master instance. Some part of pull sheet also pushed to the production instance. so did a smoke testing of production instance for proper working of all modules. Did some hotfixes on production related to approvals process and inven_group related issues. 	GEN-1	4.5				4.5	
<ul style="list-style-type: none"> ✔ Scrum and catch up meeting 	GEN-1	0.5				0.5	
<ul style="list-style-type: none"> ✔ Scrum and catch up meeting 	GEN-1	0.5					0.5
<ul style="list-style-type: none"> ✔ Internal Demo session on pull sheet related to inventory purposes and their linking with the pull sheet 	GEN-1	1					1
<ul style="list-style-type: none"> ✔ Sugar Performance Issues 	INVENT-423	21		5	7	3	6
<ul style="list-style-type: none"> ✔ Worked on debugging the production issue related to the subpanel-selection drawer (Items in kit) of kit purpose inventory. The subpanel was taking too much time on loading the records on the selection drawer. Also refactored the getInventoryStatusAPI to increase the fetching time of availability status of inventory records. 	INVENT-423	5		5			
<ul style="list-style-type: none"> ✔ There was a issue with the record on production instance related to the linking of serialized_group with kit (%BP2). Debugged the cause and fixed it. Found that after selecting the records, saving took a lot of time. 	INVENT-423	7			7		
<ul style="list-style-type: none"> ✔ Worked on debugging and fixing the inv_group saving issue. Saving took a lot of time for the records whose group_items are in hundreds. Found that there was a dependency which was causing a delay. Moved the formula from vardef to before_save hook. Moved the hotfix on production instance. 	INVENT-423	3				3	
<ul style="list-style-type: none"> ✔ There was an issue related to the purpose in the inventory module. On changing the purpose of inventory (group to serialized_group and vice versa) whose child items are in hundreds took a lot of time in conversion. Even sometimes some records didn't update. Might be due to the timeout issue. Debugged the code for changing the purpose. Found an issue of inventory_serial_number while creating new records for the inventory with updated purpose. Also created a report on code functionality and highlighted the areas to improve the performance. 	INVENT-423	6					6
